

Residential Electric Permits

IMPORTANT CHANGES

Beginning March 17, 2020, we are suspending the following residential inspections until further notice:

All residential electrical inspections for projects where the home is currently occupied.

At this time, we will inspect all residential properties that are under construction but not occupied.

We will continue to conduct inspections for commercial properties at this time. As you know, the situation is constantly changing, and more restrictions may be necessary or required. We are doing all we can to maintain business as usual and keep job sites moving.

Please do not hesitate to call Andrew Moore at 614-837-6742 or Lucas Haire at 614-395-2676.
